## NEWS RELEASE

### **Sharpics Presents Overhead Boom Light**

SAN DIEGO, Calif. — July 21, 2008 – Sharpics, Inc., a leading source for product photography, introduces its Overhead Boom Light (CLK-9) for space saving as it attaches to a tabletop. The light features a uniquely shaped fluorescent 30-watt bulb with a daylight color temperature of 5000 Kelvin and emits 2000 lumens for maximum output. The light has a 9” reflector with an adjustable ball bracket. The 2-section boom extends to 22” with a vertical column that extends to 18” with twist locks. Tilt angle is 1-180 degrees.
